INCREASE YOUR CLOUD DVR STORAGE

Are you running low on Cloud DVR storage and at risk of losing your favorite recorded shows?

To find out, simply press the LIST button found under the POWER button on your remote. A green status bar representing the percentage of storage available will appear at the top of your screen. In the image to the right you can see this user has only 3% free.

There's an easy fix to ensure you never

lose your favorite game or cartoon your child loves.

Your storage can be increased with just a few clicks from us. In most cases, we can double your storage for just \$5 more per month. **Call now and 2 months of additional storage is FREE!**

CHANNELS NOW AVAILABLE

We recently added the below Standard and High Definition channels to our lineup.

Expanded View

- 141 Crime & Investigation
- 142 Military History

HD

- 663 Crime & Investigation HD
- 701 Cinemax HD
- 702 HBO HD
- 703 HBO2 HD

To add Cloud DVR with FREE HD call us today!

GRAND GIVEAWAY

Congratulations to Mike & Nancy Schumacher who won a Fitbit Versa Smartwatch in our Grand Giveaway! Mike is pictured with sales representative Brent Hanson.

Wondering how to register? No problem, because there's no purchase or registration, just winners! Each month we will randomly select one of our "grand" residential customers to win. Maybe our next winner will be you!

2019 BOB PETERSON MEMORIAL SCHOLARSHIP

James Valley Telecommunications will be awarding three \$2,000 scholarships this school year to area seniors whose parents or legal guardians are members of the cooperative.

Scholarship applications have been forwarded to the guidance counselors at area schools. Applications are also available online at www.jamesvalley.com.

The deadline for returning the scholarships to James Valley Telecommunication's office is March 1, 2019. All applications must be received in the office by that date to be considered.

Seniors must be attending an accredited college, university or vocational school in South Dakota in the fall of 2019. A minimum GPA

of 3.0 is required. As part of the application process, all applicants must submit a short essay of 400 words or less on the topic, "What industry or opportunity would entice you to return to a rural community after completing your education, and why?"

JVT members can also apply for the Foundation for Rural Service (FRS) scholarship. Requirements and application instructions are available at frs.org.

JVT MANAGED WIFI

As today's technology continues to advance, almost every device in your home needs a solid Internet connection: computers, smart phones, tablets, TVs, and products like doorbells, lights, and security systems. Many people confuse the Internet and WiFi for good reason. The words are often used interchangeably.

The Internet is connected networks all over the world. WiFi is your personal wireless network within your home. A wireless connection is made possible using WiFi technology; specifically, by another device in your home called a router or gateway.

An older router is one potential cause of WiFi issues. WiFi

technology has improved a lot recently, so if your router is a few years old, it won't work nearly as well as a new one.

If your router itself is not the problem, its location might be. For you to enjoy the best possible online experience, your router needs to be able to send out a strong signal to your wireless device. In general, the signal gets weaker the farther you are from it. If possible, you should place the WiFi router on a table or a shelf. The ideal position is half-way between the floor and the ceiling.

The easiest way to get a strong WiFi signal throughout your home, and even in your yard, is by creating a bigger WiFi network.

If you are frustrated by the WiFi coverage in your home, there is an

exciting new alternative available. Called a Mesh WiFi network, this new technology combines a WiFi router with one or more satellites, which are small wireless devices you place in different rooms.

These satellites communicate with the router and provide you with a strong WiFi signal everywhere in your home; even in your backyard.

We can help ensure your WiFi is up to speed and let you know if a Mesh WiFi router would increase your signal.

Call us today to find out more and to receive your first 2 months of Managed WiFi service FREE!
